

## Fullstack Java/Web developer

Permanent position based in Lille (France)

Jooxter, the workplace efficiency leader, is looking to expand its technology team with international talents to reinforce its presence into the “Smart Building” of tomorrow.

Jooxter offers its clients to transform their workplace in line with the new ways of working (coworking, shared offices, etc). Jooxter provides a workplace management software which interacts with different autonomous IoT sensors within the building to offer new services to the occupants and occupancy intelligence to the occupier. For more information, <http://www.jooxter.com>

Founded in 2014 in Lille, the company is based in [Euratechnologies](#), one of the largest digital startups accelerators in France. The company has recently raised seed investment. It has offices in Paris as well as in London by the end of this year.

### **Responsibilities :**

Among a multitasks team, the developer’s function is fundamental for Jooxter. In collaboration with the team (Scrum framework), you’ll have various goals :

- Design, develop, test, deploy, maintain and improve software.
- Drive the development and delivery of systems; help shape system requirements, and develop analysis-level documents that reflect the requirements.
- Work with project managers and vendors on defining the scope, milestone, deliverables, and resources needed for the project.
- Perform regular design and code reviews and participate in debugging and coding to resolve issues.
- Develop prototypes and POCs to demonstrate new ideas or illustrate the use of new technologies and how to apply it into our systems.
- Work with the QE/QA team to create and refine processes and technical standards for the Corporate Systems area.
- Keep up to date with latest technologies and tools and evangelize their value within the development teams.

### **Qualifications:**

Junior or Senior, what we want the most is to build a powerful and complementary team composed of passionate people, loving new technologies, ready to take up challenges, and willing to learn.

*Minimum qualifications:*

- Degree in Computer Science or related technical field or equivalent practical experience.
- At least one professional software development experience.

- Experience with one or more general purpose programming languages including but not limited to: Java, Java EE, MySQL, (MVC, Design pattern DAO), JPA, Hibernate.
- Experience with back/front end Java technologies and/or back/front end Java frameworks.

*Preferred qualifications:*

- Experience with the latest and greatest web standards, including HTML5 and CSS3.
- Knowledge of web libraries and frameworks such as , Apache Cassandra, Spark, Scala, AngularJS, jQuery, Ionic.
- Sense of web design and attuned to the fundamentals of user experience.
- Familiarity with the whole web stack, including protocols and web server optimization techniques.

**Benefits :**

We offer fast-paced, dynamic work environment including a competitive salary and benefits including medical, vacation and holidays.

We offer a **welcome pack** to help your relocation in Lille, a lovely city, in the heart of the triangle that links three of Europe's main metropolises - London (1h20 min), Paris (1h) and Brussels (30min).

**We need you !**

Imagine what you could do here. At Jooxter, great ideas have a way of becoming great products, services, and customer experiences very quickly. Bring passion and dedication to your job and there's no telling what you could accomplish.

You're searching for an innovative and stimulating project ? You'd like to take part in the development of an international start-up ? You think your profile matches with our prerogatives ?
